

Langmeier Backup 10 Server

- Complete backups of Windows servers and disaster recovery
- Backup of individual disks, partitions, folders and files
- Hot VSS backup of Exchange, Sharepoint and many other applications
- Protects against encryption Trojans

Langmeier Backup 10 Server secures Windows servers and applications and ensures the seamless recovery of them. The software protects servers and backup locations from ransomware and prevents encryption Trojans from accessing the backup. The central backup monitoring console is included in all Langmeier Backup 10 subscriptions and ensures that IT administrators keep track of the data security of several servers and clients. The disaster recovery has been made more intuitive in Langmeier Backup 10' Server, and the Recovery Wizard will restore windows servers in just a few clicks.
